

# UNIT4<sup>®</sup> SYSTEM QUICKSTART GUIDE

- STEP 1** Remove the breakaway tab at the bottom of the TPAK<sup>®</sup> before loading into magazine.
- STEP 2** Hold the TPAK vertically. Align the grooves inside the magazine with the CO<sub>2</sub> cylinder.
- STEP 3** Insert the TPAK fully into the magazine, using the grooves as a guide until you can no longer push the cartridge forward.
- STEP 4** Swing the bottom door closed.
- STEP 5** Push the latch clip through the bottom door carabiner. Ensure the carabiner snaps back into position, locking the clip into place.
- STEP 6** Close the draw latch with one fluid motion, applying adequate pressure to fully close the magazine.
- STEP 7** Upon closing the magazine, the CO<sub>2</sub> canister will be punctured and ready for use with the UNIT4 training rifle.

**WARNING:** The TPAK contains a CO<sub>2</sub> cylinder that can be extremely dangerous if misused or improperly handled. When inserting or removing the TPAK, always point the bottom of the magazine in a safe direction and away from your body or another person.

## LOADING THE MAGAZINE

Insert the magazine into the magazine well until you feel it click into place. Once fully inserted the UNIT4 system is loaded and ready for use.

## REMOVING THE TPAK

- STEP 1** Eject the magazine by pushing the magazine catch button and pulling the magazine downward.
- STEP 2** Using your fingers, depress the latch spring and pull open the draw latch. Remaining gas will expel once the draw latch has been released. *If you do not hear the remaining gas expel, or the TPAK remains engaged with the piercer, press downward on the TPAK to release the excess gas.*
- STEP 3** Press the gas release valve to confirm all remaining gas has been released.
- STEP 4** Push the carabiner into the bottom door to release the latch clip. Open the bottom door and remove the TPAK.

**WARNING:** READ AND FULLY UNDERSTAND THE OPERATOR'S MANUAL BEFORE OPERATING ANY UNIT4 TRAINING SYSTEM.
